

# Why PENGUIN?

- Reduce maintenance and handling cost
- Harmless to human and environment
- Increase consumer's confident
- Multi purpose of combination and application
- Improve productivity and cost effectively in overall system

## Product Highlight Features

- Fast and easy installation
- Light weight & easy handling
- Corrosion, biological and chemical resistant
- Superior flow characteristics
- Used extensively worldwide
- 2.5 times safety factor performance testing.
- Economical
- Durable connection joint

## Industry

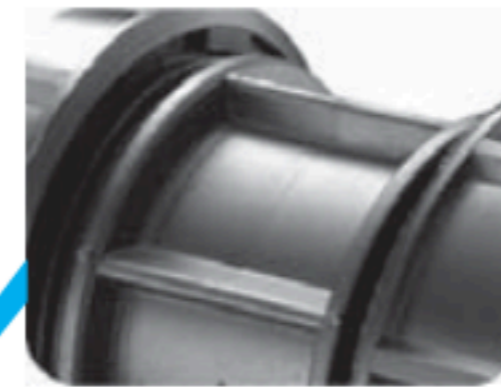

- Building
- Infrastructure
- Agriculture
- Mining
- Cable ducting
- Aquatic

## Installation Method

- Mechanical

## Application

- Plumbing pipe line
- Water distribution system
- Sewerage pipeline system
- Drainage system

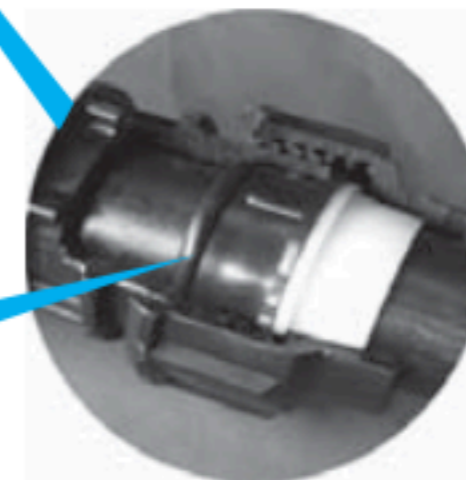

Enhanced ribs to strengthen performance up to PN16

Produce with high performance polypropylene with corrosion, biological and chemical resistant complied to BS6920

Come with high quality components to meet international standard requirement.

Rubber O'Ring complied to AS1646 with Long term performance

Excellent UV protection to maintain product structure during outdoor exposure
